

A class card, with care

A simple guide for the person organizing the card.

1. Invite the class

Use your usual school channel to invite classmates. A name, a kind sentence or a little drawing is enough. Signing is optional; no one needs to explain if they pass.

2. Keep the focus on care

Use the title and name students normally use. Leave out health questions, lesson requests and questions about returning to school. Respect any request for privacy or no messages. No reply is needed.

An invitation you can adapt

We're putting together a card for [Teacher's name]. If you'd like to take part, please add a short note, your name, or a drawing by [day]. You do not need to write about their health. Taking part is optional. Please give your note to [organizer].

3. Choose and print only what you need

Page 2: a coloring card with space for a personal note.

Page 3: a class card with 24 spaces.

Page 4: 12 wider spaces; print extra copies as needed. Leave unused boxes blank.

Match the PDF to your paper: A4 or US Letter. Select page numbers in the print dialog. Print single-sided, portrait, at **100% / Actual size**. No folding or cutting is needed.
